

**INVESTMENT PROPOSAL
(203) 283-9477**

Prepared for:
Website Visitor

Notes: This is a special offer to web-site visitors. If you have any questions feel free to call us.

***FYI:** This setup is designed for efficient order processing in your deli, bar or coffee shop. One cashier takes the order and rings up the sale, collects the money and the kitchen area receives and prepares the order. A simple feature as this one is key to making more money during busy lunch hours. When customers see efficiency in a busy environment, they will come back. With this system, you will only need a dedicated clerk on the register, and very few in the kitchen. Replacing or training a new clerk is very easy as all prices will be pre programmed.*

Item/Service	Picture	Qty	Amount.
